

## ROBBERS FOR NEIGHBORS.

## FOUR FELLOW LODGERS ISVADE THE ROOMS OF THE CLAUSENS.

Man and Wife Fight Their Off-Flight and the Fate of the Thieves on Fifth Street and the History of a Sunday-Three Captured After a Hand-to-Hand Battle.

Catharine Burke keeps a boarding house at 11 Oliver street. Among her boarders are Theodore Clausen, a mechanic in the employ of the Atlantic Brooming Company, and his wife Mary. They occupy a room on the second floor. Clausen has saved money, and keeps a goodly stock of money in a padlocked chest in his room. The key he carried with him. The chest was removed to the floor.

Two weeks ago, two rather tough-looking fellows applied to Mrs. Burke for room and board. The one adjoining that occupied by the Clausens. The next day two more men took a room directly across the hall. The four paid their board and lodging in advance, and rushed the goods nightly in the room next to Clausen's. Clausen is away every night but Saturday and Sunday.

At 10 o'clock yesterday morning there was a knock at the door of the Clausens' room. Clausen was lying in bed reading a newspaper. His wife was leaning over the chest in which she had just put some money. Closing the chest Mrs. Clausen went to the door and unlocked it. Before she could turn the knob she was seized from behind by the four men pushed in. One of them seized Mrs. Clausen by the throat. Another put a pistol to her head.

"You keep quiet," he said, "or I'll blow the top of your head off."

The largest of the four had jumped on the bed and tackled Clausen. Clausen is a small man, but stockily built and very strong. He struggled fiercely with the man, and the pair rolled from the bed to the floor.

The fourth man, who was in the corner of the room where Clausen's clothes were hanging, and began searching the pockets. The first man, who was in the room where Clausen's clothes were hanging, and began searching the pockets. The first man, who was in the room where Clausen's clothes were hanging, and began searching the pockets.

"You keep quiet," he said, "or I'll blow the top of your head off."

## CONTINENTAL UNITY.

Canada as a Natural and Necessary Portion of the North American Union.

To the Editor of The Sun:—Sir: I have read with much interest the communications from Canada upon "Canadian Unity," and I am glad to see that the Sun of Nov. 27. Too much praise cannot be given to the enterprise and foresight of THE SUN in coming out boldly and seizing hold of and wrestling with the solution of the greatest question which will confront American statesmen during the next four years, the question of doubling the area of the United States and the practical unification of the Western continent. Your action will, if continued, soon place before the American people the direct question: "Shall this continent be half American and half European, and shall the policy of this Government be such as to perpetuate this half American and half European alliance?"

The foreign alliance would soon die out for lack of financial and commercial vitality were it not for the life-sustaining power and support which her railway system draws from American commerce. This is true not only of one of her systems of railways, it is true of all of them. It is true of the Canadian Pacific, the Great Northern, the Northern Pacific, the Great Trunk and the Canadian Pacific system. They have never been known to offer to prove the self-supporting ability of their own country by asking the United States to cut off the bonding privileges and to sever the connection of Canadian commerce with American commerce and commercial centers.

They have been only too mindful to call to the attention of the United States every treaty stipulation which would give to Canada as much as possible of the trade of the States; but I am not aware that she has ever been diligent to call the attention of our Government to the provisions of her constitution which gives to Congress the power to "regulate commerce with foreign nations," as well as "among the several States." It is not "regulating" by Congress that the Canadian Government wants. The Dominion has taxed her resources to the utmost to build her great system of railways, and she is now asking for concessions as will support them when built. The supporting of these railways, running through a sparsely populated country and for thousands of miles through an irreclaimable wilderness, is even a more serious task than the building of them. These lines have not in their own country, but in the United States, and it is a question for the people of this country whether they will support them, giving them a part of our commerce, to support them, as an important element in the vitality of our own country, or to make that support self-preserving, as it is the first law of nature, and it is a law which should be applied to the Dominion Government.

It is a question for the people of this country whether they will support them, giving them a part of our commerce, to support them, as an important element in the vitality of our own country, or to make that support self-preserving, as it is the first law of nature, and it is a law which should be applied to the Dominion Government.

to the control and ownership of the Canadian Pacific Railway, and, being a Government property, it is without either stock bonded or mortgage indebtedness, as an asset of the Government of five hundred to seven hundred thousand dollars will go with this gift, it will be in fact a gift of millions of dollars to the Canadian people, and offered to the spending and hungry investor. With the money thus obtained, the schemes upon the State an epidemic outbreak of loyalty will be due, and may be expected before the first of May next.

The cash thus received from the floating of the bill will be a contribution to the effort to prolong the struggle between policy and destiny, and during this struggle the under the Government of the Canadian people are fast being ground bankrupt.

Canada does not possess the physical or the political elements of a nation by herself. No country separated by wide natural barriers, with the several portions thus separated lying outside of a great country from which they are separated by no barrier, but with which they are united by every geographical tie, can have the physical conditions to make her a nation. The attempt to tie the several portions together and into national unity is a national disaster.

Much less, even, she the political conditions of a nation, which she owes a prior allegiance to a foreign Government separated from her own by an ocean. The attempt to tie the several portions together and into national unity is a national disaster.

## A \$23,000,000 CANAL SCHEME FOR THE CITY OF SEATTLE.

Senator Morgan Believes that the Anti-Option Bill is Doomed to Defeat—An Important Woman Officer Seeks—More Weddings in the Supreme Court Circle, Including that of a Daughter of Chief Justice Fuller—The Foreign Diplomats Returning to Their Posts—Wannamaker's Weird and Picturesque Hungarian Band.

WASHINGTON, Dec. 4.—The Senate Committee on Commerce, at the earnest solicitation of Senators Squire and Allen of Washington, amended the last River and Harbor bill by providing that an appropriation of \$500,000 should be made to begin work upon what was called the "Lakes and Sound" project. It is not known whether the Senate will pass the bill, but it is believed that it will.

Senator Morgan believes that the Anti-Option Bill is doomed to defeat. He is a strong supporter of the bill, but he believes that the Senate will not pass it. He is a strong supporter of the bill, but he believes that the Senate will not pass it.

## OLD AARON SHAW'S PROPERTY.

He Finally Deeds His Mill Holdings to His Business Manager, But Old Man Shaw Is Not Dead.

Knowlton, Conn., Dec. 4.—Old man Aaron Shaw, the rich Philadelphia manufacturer, who has been visiting in the home of James Freeland, manager of the Shaw stock mill at the mill village of Palmetown, seven miles southwest of this city, led Mr. Shaw's aged wife in Philadelphia to believe that he was a prisoner of Mr. and Mrs. Freeland, and still acted in their private notes in the village. He seems to enjoy his stay. Mrs. Shaw recently became alarmed on account of her husband's prolonged absence, and sent two business friends of his, Messrs. Swire and Scott, in October, to fetch the old gentleman home. Mr. Freeland locked his cottage doors when the country came, and several Philadelphians corps proceedings in which the Philadelphians were beaten.

The quarrel about old man Shaw is by no means ended, however. In the opinion of aged Mrs. Shaw, which is shared by Messrs. Swire and Scott, her husband was coaxed and lured away from Philadelphia in the autumn of 1891, and she believes that that his motive in so doing was to persuade the old gentleman to deed to him his \$50,000 mill in Palmetown. The suspicion, eventually, was justified, for they have already got it. At the time the Swires and Scott arrived in Montville in October, Mrs. Freeland had had a deed executed, according to whose terms the Shaw stock mill and the Freeland mill were to be sold for the consideration of \$1, and all that was lacking to make the transfer paper valid was the signature of Aaron Shaw. The deed was then signed by the Swires and Scott, and the deed was then signed by the Swires and Scott.

The deed was then signed by the Swires and Scott, and the deed was then signed by the Swires and Scott. The deed was then signed by the Swires and Scott, and the deed was then signed by the Swires and Scott.

## Progressive Housekeepers.

Are constantly on the lookout for new food products, and the excellence of their cooking bears testimony to the good results of their progressiveness.

## Cottolene.

the new shortening and frying material is a great favorite with all housekeepers who use the best food products, and their sweet, flaky pastry without a suspicion of grease, their delicious cakes and light wholesome biscuits and rolls speak volumes for the merits of the new cooking fat. Every housekeeper in the land should give COTTOLENE a trial. It is for sale by all grocers.

Beware of imitations.

Manufactured only by N. K. FAIRBANK & CO., CHICAGO, ILL., and Produce Exchange, N. Y.

## NED HANLON TALKS BASEBALL.

What He Thinks of Putting the Pitcher Back—Hints and Sacrifice Hits.

BALTIMORE, Dec. 4.—Manager Ned Hanlon has made a careful study of the proposed new rules, and as he reflects the views of President Knickerbocker, he has a few suggestions to make with reference to the placing of the pitcher, he said.

"I think that if the sentiment of the League meeting is to be carried out, the pitcher will be placed back over eight feet, because this distance will come near giving the batter a chance of breaking even with the pitcher, something the public really has been demanding for years. I am positive with reference to the placing of the pitcher, he said. "I think that if the sentiment of the League meeting is to be carried out, the pitcher will be placed back over eight feet, because this distance will come near giving the batter a chance of breaking even with the pitcher, something the public really has been demanding for years. I am positive with reference to the placing of the pitcher, he said.
